

Nectifirm Neck Cream

Firming the neck & Décolletage

Frequently Asked Questions :

- **Why do I need a neck cream? Can't I use my face moisturizer?**
You need to use a neck cream because the neck ages differently from the face and requires its own unique topical anti-aging technology. Facial moisturizers will only provide minimal benefits and anti-aging results on the neck.
- **Will this product clog my pores?**
Nectifirm will not clog your pores. However, if you are prone to acne along your chin and jaw line, you should only apply Nectifirm on your décolletage and neck.
- **My skin is sensitive. Can I use this product?**
Yes. Nectifirm can be used for all skin types, even sensitive.
- **What are some of the most common signs of aging on the neck?**
The most common signs of aging on the neck include: slacken skin, crepiness, horizontal necklace lines, turkey neck appearance, platysmal bands, fat accumulation and mottled skin appearance (Poikiloderma).
- **Nectifirm claims to firm the décolletage. Does that mean it firms the breast?**
No. Nectifirm firms the skin on the décolletage, but it will not firm the breast tissue. Nectifirm contains a lipopeptide at clinical levels to help firm lax skin.
- **Why is this product darker in colour than other creams?**
Nectifirm is darker in color than traditional white creams due to the natural extracts and high concentration of actives in the product.
- **I am in my 20's and starting to notice signs of aging on my neck. Can I use this product?**
Yes. Young and mature skin and anyone desiring a younger, firmer looking neck can benefit from using Nectifirm. For best results, it is recommended that Nectifirm and a full range of anti-aging treatment are started early.
- **How does this product work differently than retinol and alpha hydroxyl acids?**
Nectifirm specifically targets the different symptoms of the aging neck as opposed to just exfoliating the top layers of the skin.

➤ **What ingredients help to reduce lines and wrinkles on the neck?**

Nectirim contains a tripeptide that increases collagen production making skin appear firmer and smoother.

Benefits of Nectifirm:

- Significantly firms and tightens skin on the neck
- Reduces the appearance of fatty tissue under chin and neck
- Dramatically lessens fine lines and wrinkles
- 96% of patients experienced a firmer neck

* Nectifirm® used twice daily, AM and PM. Results may vary. No other products or treatments were used.
